This will be the first page after user login. There is a side menu that provides users links to edit their account info, change password, accept friend invitation and event invitation.

It has two tabs at the bottom that one is for the main feature, Calendar; the other is the friend list. Users are able to click the plus sign on the top-right corner to add new friends or events.

This is the page for event creating or editing events. We are able to input information about the event, and invite friends from friend list, also remove people from invited list.

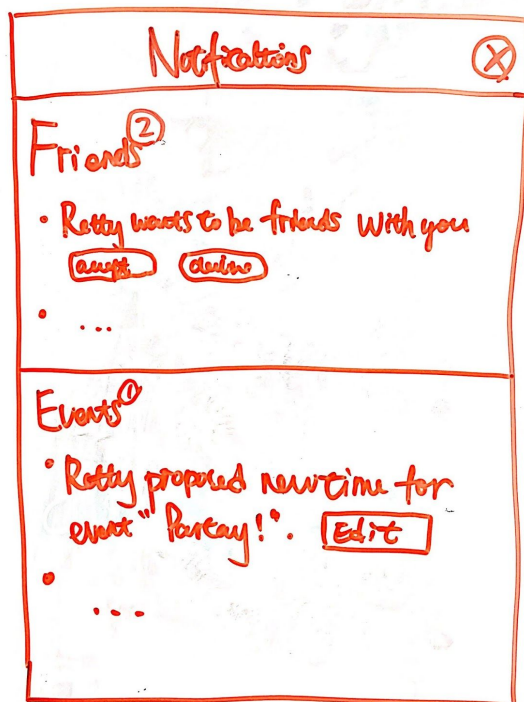

After saving the event, the event will be showed on the front page of the calendar app. If user click on one of the event, the app will jump to event viewing page. This event detail page shows

a timeline of update made to this event. User can post new messages about the event on this event detail page.

This is the page from one of link in the side menu of front page that helps users to check on friends' invitations.

We also provide a public event pool that user can search and join public events. User can apply filters to search on events, such as categories, time, and location.

Event Type

Party ☐

Concert ☐

Start After 9:00AM 9-29

End By 10:00AM 9-29

Location Seattle, WA

Apply Filter

A hand-drawn prototype of an event filter form. It is enclosed in a rounded rectangle. At the top, it says "Event Type" followed by "party, concert...". Below this is a horizontal line. Then "Start After ..." followed by another horizontal line. Then "End By ..." followed by another horizontal line. Below that is "Location". Under "Location" are two dropdown menus: "State" and "City", each with a small heart icon in a box to its right. Below these is "or" with horizontal lines on either side. Then "Zipcode" followed by a text input field. At the bottom is a button labeled "APPLY Filter".

After user click on a specific event, this will be the confirm page of users add this event to their calendar page.

public event non-owner view

A hand-drawn prototype of a public event non-owner view. It is enclosed in a rounded rectangle. At the top, it says "EVENT" with a back arrow on the left and a trash can icon on the right. Below this is "Time" followed by two text input fields with a right-pointing arrow between them. Then "Participants in your Calpals" followed by three text input fields. Below that is "Location:" followed by a large text input field. At the bottom right is a button labeled "I'm In".

1. if coming from "edit", display this
2. if coming from search, hide this

These are our prototype UI diagrams.
