Calendar

friends

It has two tabs at the bottom that one is for the main feature, Calendar; the other is the friend list. Users are able to click the plus sign on the top-right corner to add new friends or events.

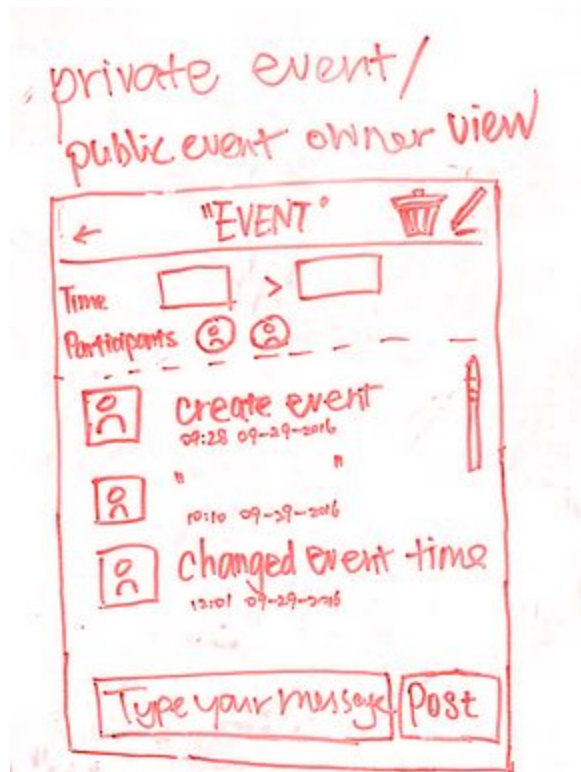

This is the page for event creating or editing events. We are able to input information about the event, and invite friends from friend list, also remove people from invited list.

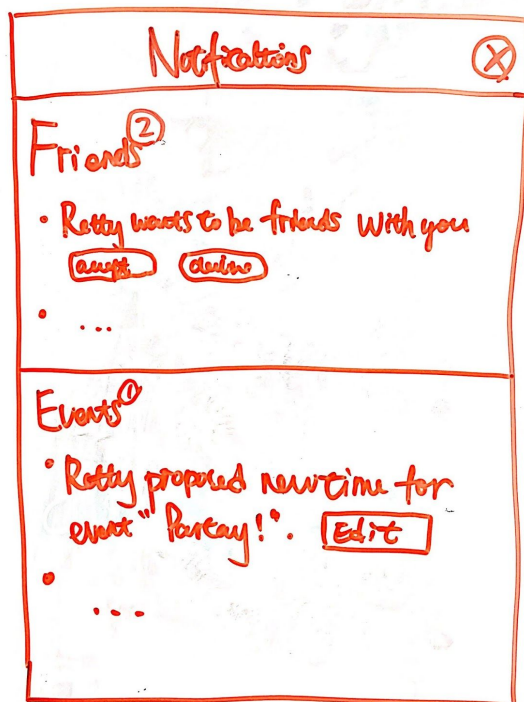

After saving the event, the event will be showed on the front page of the calendar app. If user click on one of the event, the app will jump to event viewing page. This event detail page shows

a timeline of update made to this event. User can post new messages about the event on this event detail page.

This is the page from one of link in the side menu of front page that helps users to check on friends' invitations.

We also provide a public event pool that user can search and join public events. User can apply filters to search on events, such as categories, time, and location.
